

**Some of our products will  
work for you for less than  
minimum wage!**

*Introducing the Samuel Jackson*  
**Rental Plan**

How does it work?

**Feature**

**Benefit**

Experiment with your moisture control ideas! Use our powerful products to help.

Freedom to try new ideas and techniques without a capital commitment. Wondering how much gas a new heater will save? Try it by renting!

Low, low rental charges.

Rent a new Humidaire Unit for \$10.00/hour.  
Rent a 4-Million Btu/hr heater for \$5.00/hour.  
Return on expense for both gin and grower is tremendous!

Rent new Samuel Jackson products that perform time tracking. Rental charges are by the hour.

Pay only for the hours you need. Minimizes expense when the right product is chosen for the wrong season (a moist air system in a monsoon year!)

This is a “rent to try”, not “rent to buy” program.

Deduct cost of operating hours from taxes as operating expense (to extent allowed by law).

Rentals can be converted to a Time and Bales or a cash purchase at any time.

Keeps a positive cash flow for the gin by charging a fee per bale toward purchase, allowing the gin’s payments to ride up and down with crop conditions.
